

CONVERSIONS FROM LINEAL FEET TO BOARD FEET IN STANDARD SIZES OF WESTERN LUMBER
Board Measure Equivalents

This table, based on Standard Nominal Sizes (from 1 x 2 to 8 x 24) has been developed by Western Wood Products Association as an aid to find the equivalents between lineal and board feet. The common lengths between 6' and 20' are tabulated in the table; a formula is provided for calculating other lengths. The table can be used when dollar amounts are added, as the basis of converting cost per piece. For lengths, other than those tabulated, the formula for converting lineal feet to board feet is: **$T \times W \times L = \text{Board feet } 12$**

LINEAL FEET PER BOARD FOOT	NOMINAL SIZE	BOARD FEET PER LINEAL FOOT	BOARD FEET (ROUNDED TO NEAREST 100TH)							
			6'	8'	10'	12'	14'	16'	18'	20'
6.0000'	1 x 2	0.1667	1	1.33	1.67	2	2.33	2.67	3	3.33
